

Wind sensor Eolis 3D Wirefree RTS

The Eolis 3D Wirefree RTS is part of the process Act for Green, it received the eco-design expertise to reduce its environmental impact.

ELECTRONIC COMPONENTS

Microprocessors have been selected for their more recent technology and miniaturization, which requires less material and energy in their manufacturing process.

DURABILITY

Batteries durability has been cared to reduce their renewal over the life of the product. The autonomy has been maximized up to 3.6 years. Battery are externally disposed so they can be easily repaired.

RAW MATERIALS

This product has been tested by some external laboratory and is compliant with REACH and RoHS regulations.

PACKAGING

This packaging guarantees the use of 50% recycled fibers cardboard and 100% recycled fibers instruction guide. Wedge in the packaging can not be made from fossil material.
