

Curtains motor GLYDEA ULTRA Zigbee

Our commitment by 2030: 100% of SOMFY products sold will be eco-designed.

ACT FOR GREEN is SOMFY's voluntary eco-design initiative, which goes beyond current regulations. The aim is to reduce the environmental impact of products throughout their life cycle: from the extraction of raw materials to end-of-life.

STANDBY CONSUMPTION

The eco-design of this product has made possible a reduction in standby power consumption to less than 0.4 Watts. As the product's primary source of CO₂, this action has significantly reduced its environmental impact.

DURABILITY

Beyond our commitment to quality, this product has been designed for easy disassembly and factory repair.

RESSOURCES

Materials selection respects international environmental and health requirements. This product has been tested by an external laboratory to certify compliance with REACH and RoHS regulations.

PACKAGING

Priority has been given to the use of renewable materials. Instruction leaflets are made of 100% recycled paper fibers, and cardboard from at least 50% recycled fibers. Most of the packaging is recyclable at the end of its life.

SOMFY is committed to provide ISO 14040-compliant environmental declarations, named PEpecopassport®, validated by an independent external agency. Each ACT FOR GREEN product owns a dedicated and available PEpecopassport® sheet. Find out more about **GLYDEA ULTRA ZB**, PEP n° SOMF-00184-V01.01-EN.
