SUNEA 40 SOLAR io

Self-powered by daylight and eco-designed
motorised system for vertical screens and valance

Solar powered motorised screens: What are the advantages?

Adjust brightness levels while also protecting your privacy and controlling changes in light and temperature, especially in the summertime!

Take advantage of the power of the sun and fit your home with motorised solar screens.

➤ No major work required for installation!

- No connection to the electrical system.
- Professional installation, which takes place entirely from the outside.

➤ No damage to the frontage

- No drilling into walls.

➤ A screen entirely self-powered by daylight

- Runs on a natural, inexhaustible energy source
- Does not need full sunlight to operate
- Works whatever the time, whatever the weather, guaranteed even in a power failure.

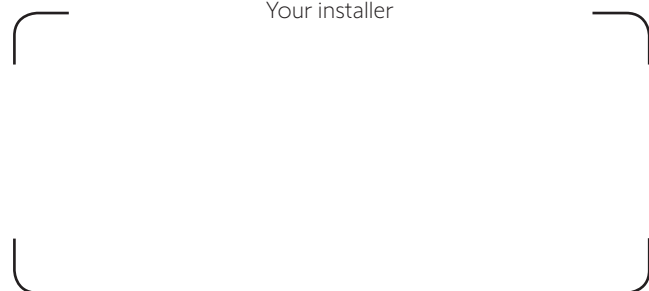

6 reasons to choose a Somfy solar motor for your screens

- **Reliability:** a motorised solar screen is as reliable as a motorised 230V screen.
- **30 days of battery autonomy:** up to 30 days in total darkness based on two cycles per day.
- **Battery life:** 7-year guarantee on the entire ecosystem (motor, solar panel, battery).
- **Screen protection:**
 - > Fabric protection system with a "soft start/soft close" function.
 - > Compatible with Somfy io wind/sun sensors.
- **Aesthetics of the fabric are preserved:**
 - > Perfect fabric tension to avoid creases and an unsightly pocket effect.
 - > Automatic length adjustment to adapt/correct the changes to the fabric's length due to temperature differences outside as the seasons change.
- **Eco-design:**

The SUNE4 40 SOLAR io motorised system (motor + panel + battery) is a certified ACT FOR GREEN product. The product's eco-friendly design aims to reduce the environmental impact of the product over the course of its entire life cycle, from the extraction of the raw materials to the end of its life.

Your installer

Connect screens for daily convenience

Installing motorised solar vertical screens is the first step towards a more comfortable and practical home. Connecting your screens opens up a multitude of possibilities.

Using the TaHoma switch smart control, you can connect and control all the screens in your household.

- Pair all screens with a single click.
- Control paired screens via a smartphone or voice assistant.
- Create ambient scenes.
- Receive low battery warnings.
- Make upgrades easily thanks to an extensive range of Somfy products and compatible partner products.

The TaHoma application is available for Android and iOS.

Compatible with:

*Requires an additional voice assistant (availability dependent on country)

Still unsure about installing a Somfy solar motor for your screens?

Somfy Solar app

produces a customised diagnostic report and ensures the performance of the SUNE4 40 SOLAR io before confirming installation.

The Somfy Solar app is available for Android and iOS.
